

RS App Key Setup Info

What is e-Afghan Ag?

The e-Afghan Ag is a growing, publically accessible, on-line information resource that improves Agricultural development in Afghanistan.

What is e-Afghan Ag RS App?

The e-Afghan Ag RS App is a set of Remote Solution Applications (RS App) that provide the ability to download, reference and present information from the e-Afghan Ag project.

What is the RS App Key Setup Information?

The e-Afghan RS App information is available on any device that can connect to an ftp server and display PDF files.

- **PC and Mac:**
 - The information can be downloaded through a vast array of programs and methods. Several free ftp programs (such as Filezilla and Fetch) and a large number of free personal use or paid applications (such as Allway, SmartFTP, etc) can retrieve the information.
 - Using Internet Explorer, Firefox or Chrome, you can view and download files.
 - Note, with Internet Explorer, you may view the RS App information with Windows Explorer, giving a very simple interface.
 - Note, with Firefox, you may install FireFTP with provides simple downloads.
 - We have developed a script using the programming language Python that will download the files with a single click. See the IS for DownloadScript.
 - The PDF files can then be viewed with Acrobat and the videos with the movie player.
- **iPad:** While several programs work, we utilize GoodReader. This application provides a tremendously simple download of new-and-changed-files and an easy to use reader of PDF files and display of videos. The RSApp iPad installation guide provides step-by-step instructions.
- **Other devices:** For the other devices, you should download the PDF files to your PC or Mac and then transfer them to your device using that device's procedure to transfer PDF Files.

What is the Key information needed?

The following information is the key information needed to set up the download:

- **Server name:** [ftp.afghanag.org](ftp://afghanag.org)
- **In a web browser, enter server name as:** <ftp://ftp.afghanag.org>
- **User name:** anonymous@afghanag.org
 - Note, that this is not an anonymous login, this is an actual user name
- **Password:** UC Davis
