</table>

* Complete ripening time data will be available next year.
**Variety name:** Sattarbai Bakhmali 159, 2008  
**Flowering time:** 1st to 4th week of March  
**Ripening time:** 1st week of July  
**Kernel shape:** moon shaped/narrow elliptic  
**Kernel size:** medium  
**Kernel color:** yellow brown/red brown  
**Shell type:** thin  
**Overall:** soft shelled, nut is of medium length, very narrow in shape and is appreciated in international market

**Variety name:** Sattarbai 1001, 168  
**Flowering time:** 2nd to 4th week of March  
**Ripening time:** 1st week of July  
**Kernel shape:** moon shaped  
**Kernel size:** medium  
**Kernel color:** yellow brown  
**Shell type:** thin  
**Overall:** export quality almond, soft shelled. Nut is long, narrow and thin

**Variety name:** Majedi  2010  
**Flowering time:** 4th week of February to 3rd week of March  
**Ripening time:** 1st week of July  
**Kernel shape:** moon shaped  
**Kernel size:** medium  
**Kernel color:** dark chestnut brown  
**Shell type:** thick  
**Overall:** hard shelled but very good in size and kernel is appreciated in the market
Variety name: Abdul Wahidi 153, 1003  
**Flowering time:** 2nd to 4th week of March  
**Ripening time:** 1st week of July  
**Kernel shape:** moon shaped/ narrow elliptic  
**Kernel size:** big  
**Kernel color:** red brown/ yellow brown  
**Shell type:** thick  
**Overall:** its nut has long length and fine width, kernel color is light brown and has good market

Variety name: Sattarbai Guldara 2006  
**Flowering time:** 2nd to 4th week of March  
**Ripening time:** 1st week of July  
**Kernel shape:** narrow elliptic  
**Kernel size:** medium  
**Kernel color:** yellow brown  
**Shell type:** thin  
**Overall:** soft shell, very narrow, thin and attractive, good for international market

Variety name: Qambari 143, 2009  
**Flowering time:** 1st to 4th week of March  
**Ripening time:** 1st week of July  
**Kernel shape:** elliptic  
**Kernel size:** big  
**Kernel color:** red brown  
**Shell type:** thin/medium  
**Overall:** soft shelled, light brown kernel, nut is short and narrow, good export quality
Variety name: Khairodini 172
Flowering time: 2nd to 4th week of March
Ripening time: 1st week of July
Kernel shape: moon shaped
Kernel size: big
Kernel color: red brown
Shell type: thick
Overall: shell is medium hard, very long, wide and medium thick

Variety name: Qaharbai 160, 170, 776, 1004
Flowering time: 1st to 3rd week of March
Ripening time: 1st week of July
Kernel shape: moon shaped/elliptic
Kernel size: big
Kernel color: light brown
Shell type: thick
Overall: productive variety, shell is medium hard
